I KNOW HOW TO BUILD A SOCIETY WITHOUT WAR

Leo Semashko,
Founder and Honorary President,
Global Harmony Association
The true author of this fundamental discovery is Mahatma Gandhi. The socio-cybernetic science presented above is only a modern disclosure, substantiation and verification by world statistics of the fundamental socio- genetic Gandhian law of the nonviolence varnas/sphersons, in which the term “sphersons” is only a modern universal synonym for ancient Indian “varnas”. The Gandhian Varnas Law is the law of sphersons and vice versa. Gandhi defines this law in the following quotes, each of which is confirmed by our researches, and constitutes an unrecognized absolute truth of modern social science.
Young people are a decisive force in building a nuclear-free future in which to live. Young people and women who give birth and raise children not to become victims of the new global Hiroshima and who together make up almost 70% of the population are the main opponents of nuclear genocidal and terrorist weapons. Therefore, its elimination is inevitable. It will significantly accelerate if they arm themselves with fundamental scientific knowledge of the spherical Gandhian nonviolent paradigm presented in my and the GHA books.

WGF: WGF: International bodies, such as the United Nations, are doing a lot for world peace. What more is possible and how?

L Semashko: On the basis of the spherical Gandhian paradigm presented above, we have created several innovative fundamental peacemaking projects, including the project of a harmonious spherical UN. It is replacing the modern, dis harmonious in its essence, and therefore the militaristic UN, which for 75 years, with all the partial peacemaking achievements, turned out to be structural and intellectually incapable of building a global security/peace system, which excludes continuous wars, an escalating arms race and a sharpening threat of global nuclear genocide/ecocide. Fundamental scientific perspective to improve the structure and technologies of global nonviolent governance are disclosed within the framework of the Gandhian paradigm in the last book of the GHA under my scientific guidance: “Antinuclear Manifesto XXI” [https://peacefromharmony.org/?cat=en&ckey=308]. In this “Manifesto” paradigm, its 44 co-authors from 25 countries, including four Nobel laureates are proposing to the UN and key nuclear powers to replace the genocidal nuclear triad with the Gandhian peace/sphers/spherons tetrads through the positive, constructive negotiations of these powers under the UN auspices. Why not then are they preparing a new START Treaty? Our opinion does not hinder but facilitates it and its perspective.

WGF: How important is understanding and participation of youth in the anti-nuclear campaign?

L Semashko: Young people are a decisive force in building a nuclear-free future in which to live. Young people and women who give birth and raise children not to become victims of the new global Hiroshima and who together make up almost 70% of the population are the main opponents of nuclear genocidal and terrorist weapons. Therefore, its elimination is inevitable. It will significantly accelerate if they arm themselves with fundamental scientific knowledge of the spherical Gandhian nonviolent paradigm presented in my and the GHA books.

WGF: COVID-19 has been difficult all around the world. What learnings do you take away from this tough time?

L Semashko: Lesson is one. Humanity – due to the global policy of pathological confrontation between leading powers and world leaders – lacks solidarity, cohesion, partnership and resources spent on lethal weapons, primarily nuclear, for joint and coordinated overcoming of the COVID-19 pandemic. It requires, above all, a ban on nuclear weapons and the channeling of the freed up trillions of dollars to protect the world population from it.

WGF: What are your future plans? What are the causes dear to your heart?

L Semashko: My plans for the future are to complete the GHA latest book, dedicated to the new, Gandhian nonviolent democracy, as an alternative to traditional, militaristic/violent, which has finally discredited itself in the USA, the EU and other countries in its inability to solve the global problems of nuclear disarmament, pandemics, economic crises, environmental disasters, poverty, inequality and the like. The collapse and inewspiration of Western violent democracy was clearly predicted by Mahatma Gandhi. His prediction is coming true in our time.

The dear humanistic Gandhian values of peace, nonviolence, love, harmony, equality, justice, brotherhood of nations are close to my heart, to the promotion of which I was happy to devote my entire conscious life.

On the basis of the spherical Gandhian paradigm, we have created several innovative fundamental peacemaking projects, including the project of a harmonious spherical UN. It is replacing the modern, dis harmonious in its essence, and therefore the militaristic UN, which for 75 years, with all the partial peacemaking achievements, turned out to be structural and intellectually incapable of building a global security/peace system, which excludes continuous wars, an escalating arms race and a sharpening threat of global nuclear genocide/ecocide.

Though the law of varna is a special discovery of some Hindu seer, it has universal application. The world may ignore it today, but it will have to accept it in the time to come... “Varna is the best guarantee of a happy life...” [Gandhi, M. My Religion, 1955, pp. 169–172 – http://gandhiisvagramaham.org/pdf-books/my-religion.pdf].

Only the knowledge of this sociogenetic law, unknown to humanity, allowed Gandhi to achieve an impossible result for a violent civilization: to provide India with freedom and independence from the strongest violent British world empire without a single shot and without a single victim. Gandhi’s law, as the law of nonviolence, for so long has not been recognized by the traditional social science, built on violence; and therefore ideologically alienated from it, opens up for humanity a fundamentally new, holistic logic of a “substantially new manner of thinking” [Einstein], which ensures its survival in nonviolence, love, peace and harmony.

WGF: Since 1970, after finishing the Moscow State University graduate school, your community participation has been immense. What drives you to keep on working towards a better society and a better planet?

L Semashko: On this score, I have two fundamental motives. First, this is my mother’s will to find a society “in which there is no war” so that people do not repeat her and my fate, when her husband and my father was killed in the first days of the war with the Nazis in June 1941, as written in many of my works. The second one is the belief in the harmonious, humanistic nature of humankind, revealed by the entire history of world philosophy and crowned with brilliant scientific guesses of Mahatma Gandhi’s nonviolence, who saw in its spheral substance “the greatest force of mankind mightier than the mightiest [nuclear] weapons of destruction.” My thinking and work in this direction have made the meaning of my whole life, which I am very proud of.

WGF: You have authored more than 600 scientific works on philosophy, sociology, culture, law and policy, including 20 books in many languages. What is the general focus in your writing?

L Semashko: My orientation is conviction, faith and scientific fundamental justification of global peace/nonviolence from the sociogenetic harmony of the Gandhian spheres/spherons, briefly defined above.

WGF PERSON OF THE YEAR 2021
